

## **[Working Title] Generation With Fine-grained Citations**

Spotlight Presentation 1, Supervisor: Haoyu He

May 31, 2025, Niklas Munkes

---

## Problem

Given a document  $A$  (which may be generated) with a citation  $c$ , find the passage  $p$  in the cited document  $B$  that is most relevant to  $A$ .

If  $A$  is generated,  $p$  should ideally be the passage in  $B$  that *caused* the LLM to generate the statement that cites  $B$ .
